

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## TO OUR PATRONS AND THE PUBLIC.

---

IN issuing our new and very full Catalogue and Price-List, we meet a want long felt by our patrons in all parts of the country. By aid of the illustrations and price-lists persons residing at a distance may, without preliminary correspondence, intelligently select and order, with a full assurance that their orders will be correctly and promptly filled.

Our long experience, large facilities, and extensive acquaintance with the trade enable us to assure our patrons, whether dealers or consumers, that we shall furnish the best goods at reasonable prices.

To amateurs in want of best instruments or fine tools, for scientific or mechanical purposes, we offer an extensive assortment on most favorable terms.

Our Price-List, though generally stable, is subject to market fluctuations, *without notice*.

Unless half a dozen or more of an article are ordered at one time, goods will not be sold at the dozen rate.

To parties purchasing large quantities we offer special terms.

For one cent per two ounces, or fraction thereof, goods can be sent by mail to any part of the United States; but no package exceeding four pounds can be so sent.

Cartage or postage will be added to invoice of goods shipped otherwise than by express.

Unless otherwise stipulated, goods will be shipped at risk of purchaser.

Money may be transmitted by post-office order or in registered letter. All money sent to us will be at sender's risk. When goods are sent by express, C.O.D., collection charges will be added to the bill.

Articles not strictly in our line purchased for parties ordering, and billed at lowest market rates.

FRASSE & COMPANY.

# MACHINERY.

---

No. 2 Machine.

## FLEETWOOD SCROLL-SAWING MACHINE.

No. 1 is handsomely finished, works true, has iron table veneered with walnut, double treadle, wheel-guard, and clamp for holding the finest saws. Price, \$15; boxing, 40 cents.

No. 2 is same size as No. 1 throughout; has iron table japanned, single treadle, will hold only coarse saws. Price, \$10; boxing, 40 cents.

No. 2, with extra clamps for holding all sizes of saws. Price, \$13.

A beautiful STAND, made expressly for the Fleetwood Scroll Saw, with legs of iron and top of solid walnut, ready for shipment, price, \$6.

BORING AND DRILLING ATTACHMENT for the Fleetwood Scroll Saw, complete, with one drill and boxed for shipment, \$5 50; extra drills, 15 cents each.

Price-lists of designs for scroll-sawing sent on application.

- No. 1. 4 ft. guides,  $4\frac{1}{2}$  in. between poppets, . . . . \$60 00
- No. 2. 6 ft. guides, 6 in. between poppets, . . . . 90 00
- No. 3. 6 ft. guides,  $7\frac{1}{2}$  in. between poppets, . . . . 110 00
- No. 4. 7 ft. guides, 10 in. between poppets, . . . . 150 00
- No. 5. 8 ft. guides, 12 in. between poppets, . . . . 275 00
- No. 6. 8 ft. guides,  $17\frac{1}{2}$  in. between poppets, . . . . 325 00
- With gearing to work by power, extra.
- Smooth-faced and grooved shank dies, extra.

## DROP PRESS,

With wrought-iron poppet-heads and screws.

## SCREW OR FLY PRESS.

- No. 1. Screw 2 in.  
diameter, . . . \$45 00
- No. 2. Screw 2 in.  
diameter, . . . 60 00
- No. 3. Screw  $2\frac{1}{8}$   
in. diameter, . . . 95 00
- No. 4. Screw  $2\frac{3}{8}$   
in. diameter, . . . 165 00
- Larger size screw press-  
es to order.

## UNIVERSAL ANGULAR DRILLING MACHINE.

This Drill will work at any angle. By placing the crank on the drill-spindle, it will work with or without a ratchet.

A chuck, holding from  $\frac{1}{8}$  in. to  $\frac{1}{2}$  in. drills, furnished with each machine.

- No. 1. Weight 26 lbs.,  
drills up to  $\frac{5}{8}$  in.  
hole, each . . . \$34 00
- No. 2. Weight 52 lbs.,  
drills up to 1 in. hole,  
each . . . 38 00
- No. 3. Weight 106 lbs.,  
drills up to  $1\frac{1}{2}$  in.  
hole, each . . . 65 00
- No. 4. Weight 52 lbs.,  
drills up to  $1\frac{1}{2}$  in.  
hole, each . . . 58 00

No. 4 is made of steel and malleable iron; Nos. 1, 2, and 3, wrought, malleable, and gray iron.

## HAND DRILLS.

### UPRIGHT SELF-FEEDING DRILL.

No. 1. Drills from  $\frac{1}{8}$  to  $\frac{3}{4}$  in. hole.

Length, 42 inches ; Weight, 95 lbs.

Price, with Balance-wheel, . . .	\$28 00
" without " " . . .	25 00

### UPRIGHT SELF-FEEDING DRILL.

No. 2. Drills from  $\frac{1}{8}$  to 1 in. hole.

Length, 54 inches ; Weight, 160 lbs.

Price, with Balance-wheel, . . .	\$48 00
----------------------------------	---------

**HENRY WHITON'S HAND DRILL.**

This Drill has a feed of about  $3\frac{1}{2}$  inches, and a movable platform that can be lowered six inches or removed altogether. It is suitable for the hard work of blacksmiths and others, boring a hole in iron with ease from one inch down.

Weight, 60 lbs.

Price, \$12 00.

**UNIVERSAL BREAST DRILL.**

This is one of the most convenient Breast Drills in the market. It can be altered in a moment from slow to fast speed, or the reverse, by merely pulling out a pin and shifting the handle. Attached to the end is a very ingenious chuck which will centre and hold perfectly round, flat, or square tool shanks from  $\frac{1}{16}$  to  $\frac{1}{2}$  in. The jaws are made of steel, and will hold any shaped tang.

Price, . . . . \$2 50 each.

## FORGES.

### KEYSTONE PORTABLE FORGES AND BLOWERS.

These Forges are light, strong, durable, easily worked, cheap, and occupy but little space.

The fan-blast is far superior to bellows in every respect.

Forge No. 1, with Hood.

No. 2 is the same style as No. 1, only a larger size.

These Forges are used by blacksmiths, locksmiths, die-sinkers, etc. No. 1 will produce a quick welding heat on iron  $\frac{3}{4}$  inch diameter, and No. 2 on iron 1 inch diameter.

Forge No.  $2\frac{1}{2}$ , with Lever.

No. 3 is the same style as No.  $2\frac{1}{2}$ , only a larger size.

No.  $2\frac{1}{2}$  will produce a quick welding heat on iron  $1\frac{1}{2}$  inches diameter ; No. 3 on iron 2 inches diameter, and heavier if desired.

Forges from No.  $2\frac{1}{2}$  to 4 can be used by hand or for power.

## FORGE NO. 1, WITH CLOSE HOOD.

Upon Forges Nos. 1 and 2 a close hood is placed. This hood is a strongly-made sheet-iron box or oven, completely enclosing the fire-pan, having on each side a door for manipulating the fire, etc. The close hood prevents the escape of sparks, fumes, or smoke, and is generally preferred by jewellers, dentists, etc. Also, for annealing or refining metals. Many other light-metal workers, such as locksmiths, etc., order this style. The close hood is placed on any of the Forges when specially ordered.

## THE NOVELTY PORTABLE FORGES.

Novelty Riveting Forge. Price, complete, \$30.

The advantages claimed in the Novelty Forges over all others are: 1st. It has a noiseless pressure-fan, which is arranged upon new principles, whereby it gives pressure as well as blast when desired. The fan is driven by a friction-gear, which is covered and is out of the way. 2d. It has no belt to break, shrink, or mend, nor cogs to create a noise. 3d. The driving-wheel is worked by lever-power, which is the most natural and easiest for a man or boy in working at the forge. 4th. The blast from the fan enters an air-chamber, where it becomes heated before it enters the tuyere-plate, and has many great advantages over other fans. On the inside of the air-chamber it has a funnel-shaped hopper, connected at the bottom with a valve,

by which means the Forge can be cleaned of fire, coal, or ashes in a moment. (When it is desired to use anthracite coal, a grate is substituted for the tuyere-plate.)

One important feature in the Novelty Forge is the *Loose Fire-Pot*, which in expansion and contraction, or by burning out, does not in the least affect the Forge, as the fire-pot can be replaced by the manufacturer, or duplicated at any foundry, at small expense.

The Novelty Forges are round, and are manufactured wholly of wrought, boiler, and malleable iron. The legs are of rod-iron, are constructed without bolt or nuts, and can be unshipped in a moment, if desired, for transportation.

Novelty Barrow Forge. Price, complete, \$50.

### NOVELTY FORGE FOR JEWELLERS, DENTISTS, AND OTHER FINE-METAL WORKERS.

Novelty Forge for Jewellers, etc. Price, complete, \$50.

This is the only Forge manufactured that possesses all the requisites for fine-metal workers. It has a firebrick-lined cupola for smelting purposes, a spider for crucibles to rest upon, and a cup at bottom of funnel-shaped hopper for saving of metal when crucible breaks. Where room is scarce, the Forge can be used as a stove. The rotary fan is noiseless, is driven by one-inch belt, and belt can be removed or tightened in a moment by turning a set screw.

### NOVELTY FORGE FOR LOCKSMITHS.

This Forge is constructed on the same principle as the Riveting and Barrow Forge, with a hood and two sliding doors, which, if required, can be used as a closed hood Forge for annealing steel or other metal. This Forge is adapted for all kinds of light work, such as locksmiths, die-sinkers, model-makers, plumbers, and brass-finishers.

A firebrick-lined pot for smelting purposes, and an iron pot for annealing, furnished with this forge when ordered. Price, \$15 extra.

No. 1 Novelty Forge. Price, complete, \$35.

## TURNING LATHES.

### SCREW-CUTTING FOOT LATHE.

Swings 10 inches diameter, turns from 28 to 40 inches long. This Lathe has self-acting feeding and screw apparatus, back gear in the head for slow speeds, etc.

### FIFTEEN-INCH HAND LATHE, WITH COMPOUND SLIDE-REST AND HOLLOW SPINDLE.

This Lathe swings 15 inches over shears, bed 5 feet long, takes between centres 3 feet. Head spindle is cast-steel, with  $1\frac{5}{8}$  inch bearing, 4 inches long, extending back to the hub of pulley. Size of cone pulleys,  $4\frac{1}{2}$ , 6,  $7\frac{1}{2}$ , and 9 inches; is run by a 2-inch belt. Spindle is bored hollow its entire length, so that screws or

other small articles can be made direct from a rod passed through the spindle. Has a compound slide-rest, which will work on every point of the circle; has, when desired, an outside face-plate and rest-stand, so that a wheel pattern 6 feet or over in diameter may be turned. The whole forming in itself a very complete tool for the machine-shop, brass-finishers', or pattern-makers' use. Weight, about 600 lbs.

Cut representing 1,  $1\frac{1}{2}$ , 2,  $2\frac{1}{2}$ .

nished in plain but good style. The pieces which accompany it without extra expense are two pointed centres, one spur centre, face-plate turned and polished, three T-rests, one nine inches long, one six inches; and one three inches long. The treadle is provided with a joint to avoid injury to the feet, should they get under it while in motion.

**LATHE No.  $1\frac{1}{2}$ .**—Swings eight inches diameter, turns twenty-two inches long. This Lathe is of the same description as No. 1; it differs only in the swing.

Cut representing No. 3.

**LATHE No. 2.**—Swings six inches, and turns twenty-two inches long. This Lathe differs from No. 1 only in having hardened steel conical bearings, and in being very highly finished.

**LATHE No.  $2\frac{1}{2}$ .**—Swings eight inches, and turns twenty-two inches long. This Lathe differs from No. 2 only in swing.

**LATHE No. 3.**—Swings ten inches,

and turns as ordinarily made 31 inches. The length of bed can be varied up to six feet long. Brackets and shelf are attached to the back or beneath the bed of the Lathe. This Lathe can be used as a Bench Lathe, with counter-shaft overhead, by setting the bed on short legs.

**LATHE No. 4.**—Same as No. 3, with hardened steel conical bearings.

Nos. 3 and 4 are also made with back-gearred head-stock, when required.

Bench Hand Lathe.

Either of the Lathes herein illustrated may be fitted with short legs instead of the table containing the foot-motion, and thus are adapted to placing upon a bench or stand. In such cases, a counter-shaft is supplied for running the Lathe by power.

We keep constantly on hand a variety of other Turning Lathes, prices of any of which will be sent on application.

#### SLIDE-RESTS.

These tools are provided with two slides placed at right angles with each other, carrying a tool which may be drawn back and forth or sideways by means of

Slide-Rest.—Adapted to Lathes Nos. 1, 1½, 2, 2½.

Slide-Rest.—Adapted to Lathe No. 3.

screws, allowing any position for the turning tool. It is worked by hand, and will turn straight or tapering, and face or square up surfaces.

## HAND PLANER.

As an auxiliary to the Turning Lathe, the Hand Planer is a valuable machine. Small dies, pieces of steel, iron, brass, etc., can be accurately planed up on the face or sides at any angles. The cut represents such a machine, capable of planing  $6\frac{1}{2}$  inches square, and 15 inches long. The cross-head turns and fastens at any angle for planing bevels. It is well made, and price moderate.

Price, . . . . \$75 00  
 Chuck for holding pieces, if desired (extra), 12 00  
 Tools, each, . . 35

## THE DRILL COLLET

Is a cheap device for holding common drills. It screws on the spindle of the Lathe.

## THE BIT-SHANK COLLET

Has a square hole for holding centre-bits, pieces of wood, bone, or ivory, or any article it is desired to turn.

## THE DRILL-REST

Is inserted in the end of the tail-stock spindle, to press against the work, and thus save the spindle.

## THE CROTCHED CENTRE

Is used to hold a round piece of steel, iron, etc., while drilling through from side to side.

## THE BACK OR CENTRE REST

Has three slides or jaws, moving towards the centre, and sits vertically upon the Lathe. It is used to hold work from springing, or to serve as a bearing when drilling into the end of a piece of wood or iron.

## LATHE-WHEELS.

Flat or plain iron wheel, . . . . . \$8 00  
 Grooved (with 4 speeds) wheel, . . . . . 16 00

The above includes the crank, centre-screws, and hook.

No. 1.

No. 2.

No. 1. For Foot Power,	. . . . .	\$8 00
" 2. " Steam "	. . . . .	15 00

The No. 1 Head has one end taper screw, and the other hollow, with a set screw for holding an extra taper-screw, chuck, or drills, etc.

The No. 2 Head is made with hollow ends, into which the taper-screws are screwed; so that they can be removed at any time and chucks substituted.

One or both ends are also made with straight screws, with nuts and washers for carrying emery-wheels, etc., if so ordered.

Small Polishing Heads for Watchmakers, with double screw, each,	. . . . .	\$5 00
Tables for Polishing Heads, each,	. . . . .	6 00
Flat Driving Wheel fitted on crank, centres, and Hook,	. . . . .	8 00
Grooved Driving Wheel with four speeds fitted on crank, centres,		
and Hook,	. . . . .	16 00
Catgut Belt, and Hooks,	. . . . .	1 00

# TOOLS.

## LE COUNT'S EXPANDING MANDREL OR ARBOR.

These Mandrels are made of steel, and are strong and true. They are much more convenient than those driven by the hammer, and do better work. All the working parts are hardened and well proportioned.

### EXPLANATION OF CUT.

C is the steel Mandrel; B B are two of the three keys that are drawn up and pushed down by the nut. A groove is turned inside the nut, A, which catches the head of the key, B, and thus draws them up to tighten the work. In the outside of the nut, A, is a taper hole, which the pin, D, fits, and answers for a wrench. This, like any Mandrel, requires a true hole to

make a true job. Very heavy cuts on large diameters can be done on it without slipping. F represents the tool operating on a piece of work.

### PRICES.

No. 1,	takes any hole from $\frac{1}{2}$ in. to 1 in. inclusive, each,	.	.	.	\$12 00

## CHUCKS.

## CUSHMAN'S CHUCKS.

Patented December 24, 1872.

## THE BOSS DRILL CHUCK.

This is warranted to be one of the best and most perfect Chucks in use. It holds from 0 to  $\frac{3}{8}$  in. diameter, and is truly the "Boss Chuck." Every piece is made of forged steel, and finished to a gauge.

Price, . . . . . \$8 00

## NEW PATENT DRILL CHUCK.

No. 7.

This Chuck is very compact, strong, and durable. It holds from  $\frac{1}{4}$  to  $\frac{1}{2}$  inch.

Price, . . . . . \$10 00

## HORTON'S LATHE CHUCKS.

## E. HORTON'S PATENT LATHE CHUCK, COMPLETE AND IN PARTS.

By enclosing the circular wrought-iron rack in the deep groove in the back plate, and then turning the centre faces of back and front plates true, a perfectly tight casing for the gearing is made, thus preventing the ingress of dirt, chips, etc. Remove the rack, especially from the four jaws, and an independent jaw-chuck is made, thus combining two chucks in one.

## E. HORTON'S IMPROVED CHUCK JAWS.

Patented August 26, 1873.

A raised seat, A A, is introduced on the face of the jaws, on which the work rests while turning. A groove or recess, formed in the corner of the bite and face of the jaw, removes and rounds out the same. An emery-wheel may be used for grinding off the raised parts, A A, so that work coming to a sharp corner will rest on the ground seat, A, and the bite of the jaw only, and assume a true position thereon.

No. 1.

### E. HORTON'S PATENT REVERSE JAW CHUCK.

The best Twist Drill Chuck in the market. Also used for holding work to file, etc., in place of dogs and centres. It is made 4, 6, 9, and 12 inches diameter.

### E. HORTON'S INSIDE JAW CHUCK.

The jaws project  $\frac{1}{2}$  inch from the face of the chuck, and pass into a hole in the centre  $1\frac{1}{4}$  inch diameter, allowing a pipe or rod of that size to pass entirely through the chuck.

No. 2.

(A.)

In this cut (A.) is presented a view of all chucks made over 12 inches in diameter.

## VICES.

### STEPHENS' PATENT PARALLEL BENCH VISES.

2-in. Swivel Vise, \$4 75.

Shows working parts Cam and Toggle.

2-in. Flat or Stationary Vise, \$4.

The above right-hand cut shows the Stephens Flat Vise with top removed, and working parts exposed to view.

It consists simply of a toggle, G G, and tooth-bar, *t*, held together by a spring, S, all worked by a cam, C, and hook, M, on the handle, H.

A steel rack, T, is inserted in the sliding-bar, B B. The sliding-bar is here seen disengaged, free to slide in or out, with perfect ease, to its extreme limits.

At the first start of the handle outward, the hook, M, slips from the tooth, *m*, and the spring, S, draws down upon the hook at U, firmly setting the tooth-bar, *t*, against the rack, T; as the handle is pulled further outward, the cam is brought to bear against the ridge, *n*, nearly straightening the toggle, and forcing the movable jaw with great power against the object between the jaws.

Jaws 2 inches wide; open  $2\frac{1}{4}$  inches.

*Important.*—Occasionally rub *one drop* of oil on the cam, C, and hook, M. Never oil any other part.

Swivel Vise on the Table-Clamp. Price, \$6 75.

Swivel Table-Clamp. Price, \$2.

Jewelers' Flat Table-Clamp.  
No injury to table.  
Price, \$1.

2-in. Taper Attachment. Price, \$2.

7 "	30 00	No seat.	169 "

All Vises, except the 7 inch, sent with seats, unless otherwise ordered.

## THE DOUBLE SCREW PARALLEL "LEG" VISE.

This Vise, the result of more than thirty years' experience, is stronger and better than any other, whether of foreign or American make; always parallel and holding with a tighter "grip." The jaws are of convenient shape for the workman to get near his work, equally well for filing or chipping.

Each, \$4 00	\$4 50	\$5 50

SCREW CHASERS, per pair, 70 cts.

## DOUBLE WASHER-CUTTER.

Assorted patterns.

Per doz., \$15 ; each, \$1 50.

## ANVILS.

### THE EAGLE ANVIL.

Anvils weighing 100 lbs. to 800 lbs., 11 cents per lb.

### SMALLER ANVILS ("MINIMS").

No., . . . . .	0	1	2	3	4
Weighing about, .	10 lbs.	15 lbs.	20 lbs.	30 lbs.	40 lbs.
Each, . . . . .	\$3 50	\$4 25	\$5 00	\$5 50	\$6 50
No., . . . . .	5	6	7	8	9
Weighing about, .	50 lbs.	60 lbs.	70 lbs.	80 lbs.	90 lbs.
Each, . . . . .	\$7 50	\$8 00	\$9 00	\$10 00	\$10 50

The working surface of these anvils is of one piece of Jessop's best tool cast-steel, accurately ground, hardened, and tempered for the heaviest work. The horn is covered with, and its extremity made entirely of, steel. The body of the anvil is made of the strongest grade of American iron, to which the cast-steel face is warranted to be thoroughly welded, and not to come off.

### SQUARE ANVILS.

Square anvils, flat, to lay on the bench, 75 cents per inch.

## SHEARS.

Elbow, Bench, each						5 25

## LEVER BENCH WIRE-CUTTER.

Has an adjustable  
gauge, and cuts wire  
to  $\frac{1}{8}$  inch diameter.

Price, . . . . . \$5

## TWIST DRILL GRINDING-MACHINE.

- No. 1. For grinding drills below  $\frac{1}{2}$  inch, price, . . . \$  
 " 2. " " from  $\frac{3}{8}$  inch to 2 inches, price, . . . \$

By removing the rest, the Machine may be used for an Emery Grinder.

## CIRCULAR SAWS.

These Saws are made from the very best English material, in the most careful manner, by experienced workmen.

In ordering, please state the diameter of the saws in inches; thickness or gauge of saws at rim and at centre; whether right or left hand saw (see cut); number of teeth in saw; size of mandrel and pin-holes; distance between pin-holes from centre to centre; kind of lumber to be sawed. All stock saws above 40 inches in diameter have a two-inch mandrel-hole and five-eighths lug pin-holes, three inches from centre to centre.

In all orders "Stubs' Iron Wire Gauge" will be considered the standard gauge, unless some other is specially mentioned.

# BROWN & SHARPE MANUFACTURING CO.'S TOOLS.

## CUTTERS

For the teeth of gear-wheels, which can be sharpened by grinding without changing their form.

Diametral pitch, 2 to 32; diameter of cutter,  $1\frac{3}{4}$  to 5 in.; hole in cutter,  $\frac{7}{8}$  to  $1\frac{1}{4}$  in.; price, each, \$3 80 to \$24.

## CUTTERS FOR GROOVING TAPS.

Diameter of cutter,  $1\frac{3}{4}$  to  $2\frac{5}{8}$  in.; price, each, \$5 to \$8.

## CUTTERS FOR MAKING TWIST DRILLS.

Diameter of cutter,  $1\frac{3}{4}$  to  $2\frac{3}{4}$  in.; price, each, \$3 90 to \$6 50.

## GROOVING AND SPIRAL MILLING CUTTERS.

Diameter of cutter,  $2\frac{1}{4}$  to  $2\frac{1}{2}$  in.; price, each, \$3 to \$9.

## CUTTERS FOR MILLING IRREGULAR FORMS,

Which can be sharpened by grinding without changing their shape, made to order.

Parties having occasion to use mills for irregular shapes on sewing-machine or other work will see the advantage of these cutters. A less number of cutters can be used in making a gang of mills, and they can be sharpened by grinding, at a trifling cost, without being removed from the arbor.

## EMERY-WHEEL for grinding

cutters, . . . \$1 50

ARBOR for same, . . . 3 50

### T-SQUARE AND UNIVERSAL BEVEL.

Hardened Cast-Steel. Price, \$6.

### BEVEL PROTRACTOR

With sliding arm, and half circle divided to degrees.

Price, with 6-in sliding arm, \$6 50
" " 10 " " 7 00

## DRAUGHTSMEN'S T-SQUARES.

Price, with 30-inch blade, \$15; with  
36-inch blade, \$16.

Price, with 20-inch blade, \$6.

## PLUMB BOBS.

Bronze, with screw cap and steel point, . . . . .	\$2 50
Bronze, without screw cap, . . . . .	2 00
Iron, without screw cap, . . . . .	75

Weight, about 8 ounces.

## OPEN STEEL TRIANGLES

For Draughtsmen.

## PRICE-LIST.

Angles, 45, 45, and 90 degrees. Large size, sides 8, 8, and $11\frac{1}{4}$ in., $\frac{3}{4}$ in. wide, . . . . .	\$4 50
Small size, sides 5, 5, and $7\frac{1}{8}$ in., $\frac{5}{8}$ in. wide, . . . . .	3 50
Angles, 30, 60, and 90 degrees. Large size, sides 6, $10\frac{3}{8}$ , and 12 in., $\frac{3}{4}$ in. wide, . . . . .	4 50
Small size, sides $3\frac{1}{2}$ , $6\frac{1}{8}$ , and 7 in., $\frac{5}{8}$ in. wide, . . . . .	3 50
Thickness, $\frac{1}{16}$ in.	

## WILLIS' ODONTOGRAPH

Is an instrument for describing the correct form for the teeth of wheels, and the templets and cutters used in making them. No. 1, with directions for use, \$2 50; No. 2, \$4; per pair, \$6.

## PAPER SCALES.

The advantages of these Scales are: they expand and contract nearly the same as drawing-paper, do not soil the work, and distances can be set off from them without the use of dividers. Price, 25 cents each; \$1 per set of six.

## THE DIAGRAPH.

The Diagraph is a new and valuable invention for drawing diagrams and platting surveys, by which the rapidity of platting is increased *fourfold*.

The diameter of the circle is 4 inches, and the whole length of the instrument,  $9\frac{1}{2}$  inches. It is made of German silver. Price, \$2 50; in morocco case, \$3 50.

## PATENT GAS-HEATER,

For Tempering Drills, etc.

With this Gas-Heater a bar of steel  $\frac{1}{2}$  inch in diameter can be made red-hot in 6 minutes, and in 2 minutes a  $\frac{1}{4}$  inch bar can be heated sufficiently to be hardened.

Price, \$1.

Half Size.

## POCKET VERNIER CALIPER.

Hardened cast-steel. With adjusting screw, as shown in cut, price \$6; in morocco case, \$7; without adjusting screw, \$5; in morocco case, \$6.

## POCKET SCREW AND WIRE GAUGE.

Price, \$2 50.

Front Side.

Cuts one half size.

Back Side.

## COMBINED GAUGE AND CALIPER.

This tool combines Dividers, inside and outside Calipers, and a graduated double scratch gauge. It will caliper a round bar two inches in diameter. Price, \$5.

## THE AMERICAN STANDARD WIRE GAUGE.

Adopted by the Brass Manufacturers, January, 1858.

 None genuine unless stamped as in the engraving.

Round Gauges, sizes 0 to 36, \$6  
 " " " 5 to 36, 4

## ANGULAR WIRE GAUGES.

One Third Size.

000 to 9, . . .	\$8 00
7 to 17, . . .	8 00
15 to 28, . . .	8 00
25 to 40, . . .	8 00

## LARGE SCREW AND WIRE GAUGE.

Price, \$3.

Cuts one third size.

Full Size.

STANDARD SCREW  
THREAD GAUGE.

This Gauge is intended to be used as a standard for grinding tools to cut threads according to the new system recommended for adoption by the Franklin Institute of Philadelphia.

Price, \$6.

## CENTRE GAUGE,

And Gauge for grinding and setting Screw Tools.

The angles used in this gauge are 60 degrees.  
Price, 50 cents.

Full Size.

## POCKET SHEET-METAL GAUGE.

For the use of Machinists, Jewellers, Silversmiths, Sheet-Brass Rollers and Workers, Sheet-Iron Rollers, Wire-Drawers, Rubber Manufacturers, Paper-Makers, Type-Founders, etc. Price, \$6. In morocco case, \$6 50.

For full description of Brown & Sharpe's tools send for descriptive Catalogue.

Each, . . . . .	\$1	\$2 25	

NUTS and SCREWS for Pin Vises, Stubs', each, 50 cents.

## WATCHMAKERS' TOOLS.

Lathe No. 3.

## THE NEW AMERICAN PATENT COMBINATION LATHE.

Patent extended from October 19, 1872.

The attention of the trade is called to some changes and improvements in the above "Patent Lathe." They are all made of steel, which is stiffer and in other ways more desirable than brass. All the Lathes will now be made with the full number of chucks, thus making them complete, and saving the necessity of the many orders for extra ones.

## PRICE-LIST.

No. 1, steel ; small, $6\frac{3}{4}$ in. bed, with 9 chucks, viz. : 5 split, 1 cement, 1 patent cement, 1 centre, 1 step, . . . . .	\$36 00
Nickel-plating, extra, . . . . .	4 50
No. 2, steel : large, $8\frac{1}{8}$ in. bed, with 10 chucks, viz. : 5 split, 1 cement, 1 patent cement, 1 centre, 2 step, . . . . .	39 00
Nickel-plating, extra, . . . . .	5 00
No. 3, steel ; large, $8\frac{1}{2}$ in. bed, with Universal Head 4 in. in diameter, patent slide-rest that works with cutters, 11 chucks, viz. : 5 split, 1 patent cement, 1 cement, 1 centre, and 3 step, the whole forming a complete lathe for watchmakers' use, . . . . .	120 00
Nickel-plating, extra, . . . . .	7 50

No. 4, steel ; (new) 10 in. bed, with Universal Head $4\frac{1}{2}$ in., patent slide-rest that works with cutters 11 chucks, viz.: 5 split, 1 patent cement, 1 cement, 1 centre, and 3 step, price, . . . . .	\$150 00
Nickel-plating, extra, . . . . .	9 00
No. 4, with hardened bearings, extra, price, . . . . .	165 00
No. 5, steel ; 10-in. bed, with Universal Head, $4\frac{1}{2}$ in. diameter, patent slide-rest that works with cutters, extra pivoting head, extra tail stock with feed screw, 10 split chucks, 3 step chucks, 1 taper chuck with face-plates and tapers, 1 stud chuck with screw, and brassed for cementing (this last chuck also takes on caps), hardened bearings—the whole making a most perfect Lathe, price, . . . . .	
Nickel-plating, extra, . . . . .	
On Nos. 3 and 4 is placed a jewellery attachment, or swing rest, used for setting jewels. Old lathes wanting this improvement added must be sent to us to be fitted. Price, No. 3, . . . . .	30 00
Price, No. 4, . . . . .	55 00
Nickel-plating, extra, . . . . .	2 00
Wheels and Stands, . . . . .	6 50

For further particulars send for descriptive Catalogue.

Section showing the Patent  
Elliptic Spring.

MALLEABLE IRON OILERS

WITH

ELLIPTIC STEEL SPRING.

Price each, . . . 50 cts.

Per dozen, . . . \$5 50

## CHACE'S PATENT OILERS.

The application of "Chace's Patent Spun Screw" to these Oilers renders them greatly superior to those having the ordinary cut screw. The opening being larger, they can more easily be filled, and the thread is less liable to strip or become bruised, in either case making an oiler useless.

### CHACE'S PATENT ZINC OILERS (with brass bottoms).

## METALS.

### STUBS' BRIGHT STEEL WIRE OR DRILL-RODS.

(In one or three-foot lengths.)

Nos., . . .	15 and larger	16 to 30	31 to 38	39 to 46	47 to 50	51 to 54
Per lb., . .	\$1 25	\$1 35	\$1 50	\$1 75	\$2 00	\$2 50
Nos., . . .	55 to 57	58 to 60	61 and 62	63 to 65	66 to 68	69 and 70
Per lb., . .	\$3 00	\$3 50	\$4 00	\$4 50	\$5 00	\$5 50

### MALTBY, HOPSON & BROOKS' STEEL DRILL-RODS.

(Same sizes as Stubs'.)

Nos., . . .	15 and larger.	16 to 30	31 to 38	39 to 46	47 to 50	51 to 54
Per lb., . .	87c.	95c.	\$1 05	\$1 22	\$1 40	\$1 68
Nos., . . .	55 to 57	58 to 60	61 and 62	63 to 65	66 to 68	69 and 70
Per lb., . .	\$2 10	\$2 45	\$2 80	\$3 15	\$3 50	\$3 85

### BRIGHT ENGLISH STEEL RODS.

(In three-foot lengths.)

Nos. A to Z, and  $\frac{7}{16}$ ,  $\frac{1}{2}$ ,  $\frac{3}{4}$ , and  $\frac{1}{2}$  in., per lb., 60 cents.

### BRIGHT STEEL WIRE.

(In coil for springs; Nos. by Stubs' Iron Wire Gauge.)

Nos., . . .	13 and larger.	14	15	16	17	18	19	20
Per lb., . .	35c.	40c.	45c.	50c.	55c.	60c.	65c.	70c.
Nos., . . .	21	22	23	24	25	26	27	28
Per lb., . .	80c.	\$1 05	\$1 15	\$1 20	\$1 35	\$1 50	\$2 50	\$3 00
Nos., . . .	29	30	31	32	33	34	35	36
Per lb., . .	\$3 60	\$4 20	\$5 10	\$6 00	\$6 75	\$8 40	\$9 60	\$12 00

## HARD STEEL WIRE FOR SMALL SPRINGS.

(This wire requires no tempering, but can be made into springs and used at once.)

Iron Wire Gauge:	Nos. 17 to 27.
Price per lb., . . . . .	\$1 25 to \$3 60

BRASS, COPPER, and GERMAN SILVER in sheets.

BRASS, COPPER, and GERMAN-SILVER WIRE in coil.

" " " " Rod.

BRASS WIRE on spools for springs, etc.

## HAMMERED STEEL.

(The Nos. are by the Iron Wire Gauge.)

Flat,	$\frac{1}{16}$ x No. 10.	$\frac{3}{16}$ x No. 10.	No. 6 x No. 10.	No. 0 x No. 11.				
Per lb.,	70c.	75c.	90c.	80c.				
Flat,	No. 4 x No. 11.	No. 5 x No. 11.	No. 6 x No. 11.	No. 8 x No. 12.				
Per lb.,	85c.	95c.	\$1 00	\$1 10				
Flat,	No. 9 x No. 12.	No. 7 x No. 13.	No. 10 x No. 13.	No. 11 x No. 18.				
Per lb.,	\$1 35	\$1 05	\$1 80	\$2 75				
Square, Nos.	1	2	3	4	5	6	7	8
Per lb.,	70c.	75c.	80c.	85c.	90c.	95c.	\$1 00	\$1 05
Square, Nos.	9	10	11	12	13	14	15	16
Per lb.,	\$1 10	\$1 10	\$1 35	\$1 50	\$1 80	\$2 10	\$2 40	\$2 75

JESSOP'S SHEET and BAR BEST CAST-STEEL, by the bar or cut to order.

## DALTON'S POUNCING-PAPER, FOR HATTERS' USE.

Those who use this brand will have no other.

	No. 00000 A to A.	B and coarser.
Per ream, . . . . .	\$6 00	\$5 00
" large ream, . . . . .	45 00	40 00

## MATHEMATICAL INSTRUMENTS.

We are prepared to fill orders for all kinds of Mathematical Instruments for the use of Engineers, Machinists, Architects, Amateurs, and Schools. These instruments are made of the finest material and with great accuracy. We have space to enumerate but a few :

Plain Brass Dividers :	3½ in.	4½ in.	5½ in.	6½ in. long.
Each, . . . . .	30c.	35c.	45c.	60c.
Plain German Silver Dividers :	4 in.	5 in.	6 in.	7 in. long.
Each, . . . . .	70c.	80c.	\$1 00	\$1 25
Plain German Silver Dividers, Swiss :	4½ in.	5 in.	6 in. long.	
Each, . . . . .	\$1 90	\$2 25	\$2 70	
Brass Dividers, with pen and pencil points and lengthening bar :		4½ in.	6 in. long.	
Each, . . . . .		85c.	\$1 00	
Brass Dividers, with pen and pencil points and lengthening bar, with needle points, 4½ in., each, . . . . .				\$1 00
German Silver Dividers, 6 in. long, with pen, pencil, needle points, and lengthening bar, each, . . . . .				3 50
German Silver Dividers, 3 in. long, with pen, pencil, and needle points, each, . . . . .				2 75
Bisecting Dividers : Brass, each, 75 cents ; Ger. Sil., each, . . . . .				1 12
Proportional " " " \$2 50 . . . . .				3 60
Drawing-Pens, ivory handles, each, 40, 50, and 60 cents.				
" " " Swiss, each, . . . . .				\$1 60 to 1 95
" double, " . . . . .				2 25
" for curves, " . . . . .				1 50
" for heavy border lines, each, . . . . .				3 00
Roulettes, for dotting lines, with extra wheels, each, . . . . .				\$1 00 to 4 00
Furniture for Beam Compass, of brass, with adjusting screw, in morocco case, . . . . .				5 50
Bow Pen, Pencil, and Spacing Dividers, each, . . . . .				1 50
" " " " with needle points, ea., . . . . .				1 75
Irregular Curves, of whitewood, assorted patterns, 5 to 15 in., ea., . . . . .				20
Irregular Curves, of whitewood, assorted patterns :				
	6½ to 10 in.	8 to 12 in.	13 to 17 in.	
Superior quality, each, . . . . .	25c.	35c.	55c.	
Parallel Rulers, ebony, brass mounted :				
	6 in.	9 in.	12 in.	15 in. 18 in. 24 in. long.
Each, . . . . .	25c.	50c.	75c.	\$1 00 \$1 25 \$2 50
Parallel Rulers, German Silver mounted, 12 in. long, each, . . . . .				\$1 25
Protractors : Horn. . . . .				Brass. German Silver.
	4 in. 5 in. 6 in. 7 in. 8 in.	4 in. 5 in. 6 in.	4 in. 5 in. 6 in. 7 in.	
Each, . . . . .	20c. 35c. 45c. 75c. \$1	40c. 60c. 75c.	50c. \$1 \$1 25 \$1 50	
	Paper. . . . .	Ivory. . . . .	Boxwood. . . . .	
Each, . . . . .	25 to 40c.	\$1 75 to \$11 50	50c.	
Also, Instruments in cases, from \$2 to \$70 per set.
